# DRUGS IN SPORT

**2013 LIST**

*South African Institute for  
Drug-Free Sport*

### **NOTE**

Users of this Handbook might find medications or pharmaceutical substances, particularly generic antibiotics and microciduals, that are not listed.

Preparations containing alternative substances / supplements are not included in this Handbook.

### **DISCLAIMER**

Although every effort has been made to ensure information in this list is accurate, the authors and the South African Institute for Drug-Free Sport cannot accept responsibility for the currency of the information or for any errors, omissions or inaccuracies.

This list is formulated in and for South Africa, based on local pharmaceutical information.

A list of South African  
TRADE NAMES of  
**prohibited, restricted**  
and permitted drugs /  
preparations  
&  
GENERIC NAMES of  
**prohibited** and **restricted**  
substances

based on the World Anti-Doping  
Code 2013 PROHIBITED LIST  
INTERNATIONAL STANDARD

Valid as of 1 January 2013

Compiled for the South African Institute for Drug-Free Sport  
by Marlize Smuts (MPharm)

## EXPLANATORY INFORMATION

Colour Code: Interpretation:

Black	Permitted Drugs
Red	Prohibited Drugs IN- and OUT-of-COMPETITION (prohibited at all times)
<u>Red underlined</u>	<u>Prohibited Drugs IN-COMPETITION only (only during specified competition periods)</u>
<i>Red italics</i>	<i>Generic names of prohibited substances: IN- and OUT-of-COMPETITION</i>
<u>Red italics underlined</u>	<u>Generic names of prohibited substances: IN-COMPETITION only</u>
Blue	Prohibited Drugs IN PARTICULAR SPORTS
<i>Blue Italics</i>	<i>Generic names of prohibited substances: IN PARTICULAR SPORTS</i>
[1] – [8]	Notes - see page 66 and 67

## THERAPEUTIC USE EXEMPTION (TUE)

“Athletes, like all others, may have illnesses or conditions that require them to take particular medications”.

“If the medication an athlete is required to take to treat an illness or condition happens to fall under the Prohibited List, a Therapeutic Use Exemption (TUE) may give that athlete the authorization to take the needed medicine.

The purpose of the International Standard for Therapeutic Use Exemptions (ISTUE) is to ensure that the process of granting TUEs is harmonized across sports and countries”.

For further information, go to the WADA website:  
<http://www.wada-ama.org/en/Science-Medicine/TUE/Medical-information-to-support-the-decisions-of-TUECs/>.

Please contact Anique Coetzee at the South African Institute for Drug-Free Sport with regard to queries on TUEs at  
[anique@drugfreesport.org.za](mailto:anique@drugfreesport.org.za) or at 0861 0 72437

**John mentioned the issue of sports suppliments, sports people including schools taking suppliments and of course the Comrades winner testing positive and nine athletes testing positive for banned substances at this year's Olympics. John says there is a program in South Africa now that looks at doping control and screening.**

Institute for Drug-Free Sport (SAIDS) confirmed today that the 2012 Comrades winner, Ludwick Mamabolo, has tested positive for a banned stimulant. Mamabolo could face a two year ban and be stripped of his title if found guilty by an independent tribunal. SAIDS CEO, Khalid Galant, says Mamabolo was tested after he completed the Comrades on 3 June 2012.

## NOTES [1] - [8]

### [1] BETA-2 AGONISTS

All beta-2 agonists, including all optical isomers (e.g. *d*- and *l*-) where relevant, are prohibited *In- and Out-of-Competition* except inhaled salbutamol (maximum 1600 micrograms over 24 hours), inhaled formoterol (maximum delivered 54 micrograms over 24 hours) and salmeterol when taken by inhalation in accordance with the manufacturers' recommended therapeutic regimen.

To clarify, when used by inhalation, salbutamol, formoterol and salmeterol no longer require a DoU or a TUE.

Refer to section S3 (Beta-2 agonists) of the WADA 2013 Prohibited List.

### [2] GLUCOCORTICOSTEROIDS

All glucocorticosteroids are prohibited *In-Competition* when administered via oral, intravenous, intramuscular or rectal routes.

To clarify, when used by inhalation or nasally, glucocorticosteroids no longer require a DoU or a TUE

Refer to section S9 (Glucocorticosteroids) of the WADA 2013 Prohibited List.

### [3] ALCOHOL

Alcohol (ethanol) is prohibited *In-Competition* only, in the sport codes mentioned below. Detection will be conducted by analysis of breath and/or blood. The doping violation threshold (haematological values) is 0.10 g/L.

- Aeronautic (FAI)
- Karate (WKF)
- Archery (FITA)
- Motorcycling (FIM)
- Automobile (FIA)
- Powerboating (UIM)

Refer to section P1 (Alcohol) of the WADA 2013 Prohibited List.

### [4] BETA-BLOCKERS

Unless otherwise specified, beta-blockers are prohibited *In-Competition* only, in the following sports.

- Archery (FITA) (also prohibited *Out-of-Competition*)
- Automobile (FIA)
- Billiards (all disciplines) (WCBS)
- Darts (WDF)
- Golf (IGF)
- Shooting (ISSF, IPC) (also prohibited *Out-of-Competition*)
- Skiing/Snowboarding (FIS) in ski jumping, freestyle aerials/halfpipe and snowboard halfpipe/big air.

Beta-blockers include, but are not limited to, the following: Acebutolol, alprenolol, atenolol, betaxolol, bisoprolol, bunolol, carteolol, carvedilol, celiprolol, esmolol, labetalol, levobunolol, metipranolol, metoprolol, nadolol, oxprenolol, pindolol, propranolol, sotalol, timolol.

Refer to section P2 (Beta-Blockers) of the WADA 2013 Prohibited List.

### [5] AGENTS PROHIBITED IN MALES ONLY (*In and Out-of-Competition*)

#### Certain hormones in section S2:

Chorionic Gonadotrophin (CG) & Luteinizing Hormone (LH) are prohibited in males.

Refer to section S2 (Peptide Hormones, Growth Factors and Related Substances) of the WADA 2013 Prohibited List.

### [6] PSEUDOEPHEDRINE

Pseudoephedrine is prohibited *In-Competition* only when its concentration in urine is greater than 150 micrograms per millilitre. Refer to section S6 (Stimulants) of the WADA 2013 Prohibited List and the 2013 Monitoring Program.

Clarifying information (WADA):

- The established threshold levels may be reached (rarely, but possibly) by some individuals within 6-20 hours of intake of some long-lasting therapeutic formulations.
- **Advise athletes to stop taking pills containing pseudoephedrine at least 48 hours before competition.** For therapeutic applications during the *In-Competition* period, consider the use of alternative permitted medications upon previous consultation with a physician, or apply for a Therapeutic Use Exemption (TUE) for the use of pseudoephedrine for therapeutic purpose(s).
- The threshold level has been established based on the intake of therapeutic doses of pseudoephedrine, defined as a maximum daily dose of 240mg pseudoephedrine taken either as:
  - i) four (4) daily administrations (one every 4-6 hours) of a 60mg pill (or 2 x 30mg pills), or
  - ii) two (2) daily administrations (one every 12 hours) of a 120mg pill, or
  - iii) one (1) daily administration of a 240mg pill.
- In line with this dosing regimen, the intake, for example, of a single daily dose of 3 x 60mg pills constitutes a supratherapeutic administration that may lead to an *Adverse Analytical Finding*.

### [7] GLYCEROL

Glycerol is prohibited as a plasma expander which requires the ingestion of quantities far beyond that which are commonly found in foodstuffs and toiletries. The normal use of foodstuffs and toiletries that contains glycerol (glycerine), will not cause a competitor to test positive.

Refer to section S5 (Diuretics and other masking agents) of the WADA 2013 Prohibited List.

### [8] NOTES ON SPECIFIC STIMULANTS:

- **Adrenaline:** Local administration (e.g. nasal, ophthalmologic) of adrenaline or co-administration with local anaesthetic agents is not prohibited.
- **Cathine (nor-pseudoephedrine):** Prohibited when its concentration in urine is greater than 5 micrograms per millilitre.
- **Ephedrine & methylephedrine:** Each of ephedrine and methylephedrine is prohibited when its concentration in urine is greater than 10 micrograms per millilitre.

Refer to section S6 (Stimulants) of the WADA 2013 Prohibited List.
